Dear Students of 3EV3 Evolutionary Psychology Lab:

The university has taken many measures to prepare and keep our community informed as the COVID-19 pandemic has unfolded. As you’re aware, one of these measures was the decision late last week to suspend in-person classes for the remainder of the academic term.

**McMaster in-person classes and tests for undergraduate and graduate students ended as of Friday March 13th and no in-person exams will be held at the end of this term.**

This decision was made to ensure that our activities here at McMaster are aligned with the social distancing principle so important to broader public health at this time.

We are also committed to ensuring the successful completion of the current academic term by all of our students. To do so, we have put careful thought into the use of alternative assessment methods and evaluation schemes that are fair to all students. The following describes what you can expect for 3EV3 Evolutionary Psychology Lab between now and the end of the term:

Between now and April 7, you can expect the following changes with respect to course instruction for this course:

- We will have two prerecorded video review lectures.
- There will be a discussion board opened up on Avenue to post questions.
- There will be no additional lab material.

In addition, you can expect the following changes to the assessments used for this course:

- Do not upload anything to OSF, if you have done so already, you'll need to copy that info into the template document I've uploaded to Avenue.
- The OSF website doesn't have an easy way to share the preregistrations, so I made a document for you to fill out instead.
- Please email that filled document and your results and discussion section due on the last day of class to me and both TA's scottam3@mcmaster.ca jabbariy@mcmaster.ca and feinberg@mcmaster.ca

If you have a need for accommodations, please continue to communicate with Student Accessibility Services and keep me informed.
In the event significant changes to the COVID-19 situation, further changes may need to be made to this course and will be clearly communicated to you. Please also visit https://covid19.mcmaster.ca/ for up-to-date university information.

Sincerely,

David Feinberg
